

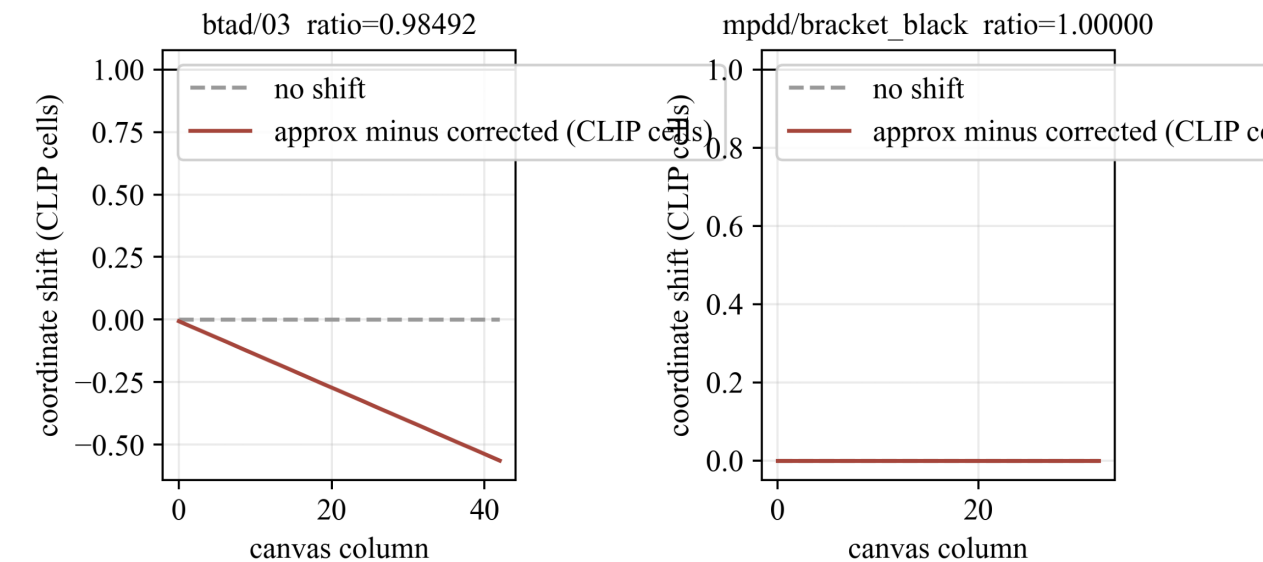

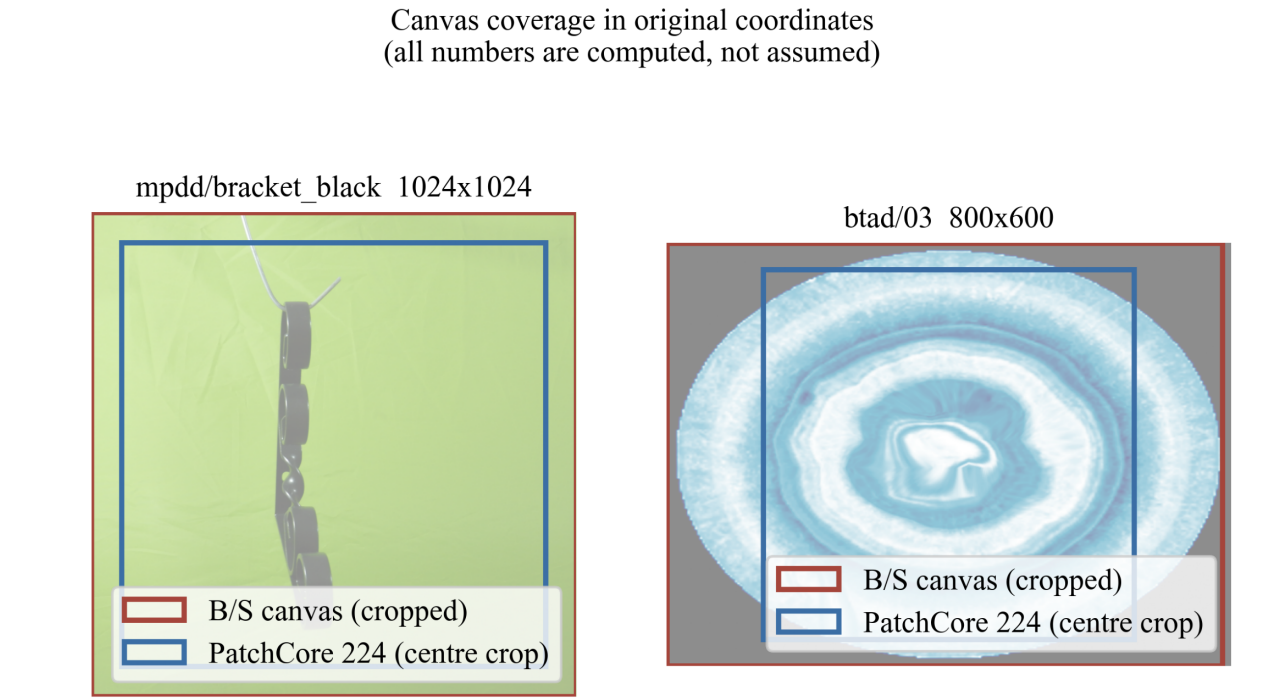

Figure S3 (continued): the picture panels of the geometry freeze and the robustness pass, each at the manuscript's 17 cm width

(1) C-to-B coordinate shift, the only non-square audited unit
source: 01_geometry/C_TO_B_COORDINATE_AUDIT.json (values copied, not recomputed)

(2) Canvas coverage in original coordinates
source: the frozen transform parameters and the B caches (computed, not assumed)

(3) The eight frozen interaction cases
source: 03_robustness/interaction_case_selection.csv (seed 0, K = 4)

Interaction cases (seed 0, K=4): ranked by the per-image localisation change of the swap; labels are offline explanation only
